

## Preliminary statistics for 2020

The following means and deciles are based on the scores of the approximately 14 000 candidates who have tested up to and including August 17, 2020.

Due to the effects of COVID-19 a small number of candidates (approximately 150) will complete their test in September. The overall statistics will not be significantly affected by these additional scores, but the final statistics will be uploaded on this site when they become available. The statistics below are a good indication of final results.
